Fotograf: James Holm

The shape makes it effective both as a media and as a demarcation/signpost, for instance at sports events.

Expand DisplayTunnel - More impact, faster set up!
With Expand DisplayTunnel, you get a three-dimensional shape with higher "visual impact" than the traditional flat sign systems. The shape makes it effective both as a media and as a demarcation/signpost, for instance at sports events.

The function is built around a specially adapted coil spring that we have sewn into a reflective fabric tunnel. The reflective surface gives extra lustre to the print in sunlight. The ends are made of light and strong channel plastic

In windy conditions, you anchor it with the accompanying grip pegs. If you are going to place it on a hard surface, you can hold it in place by putting weights in the inner pockets.

Anyone can use Expand DisplayTunnel!

All you need to do is open the bag, Expand DisplayTunnel will do the rest by itself!

Size and weight
Width: 62 cm
Height: 58 cm
Length: 200 cm
Weight incl. fabric hood: 5 kg
Bag: 1.8 kg
